Here are some of the types of information collected when visiting Abbott Nutrition Websites:

- **Log data:** When you use Abbott Nutrition websites and apps, our servers automatically record information ("log data"), including information that your browser sends whenever you visit an Abbott Nutrition website or mobile app, or your mobile app sends when you are using it. This log data may include your Internet Protocol address, the address of the webpages you visited that had Abbott Nutrition features, browser type and settings, the date and time of your request, how you used websites and cookie data.
- **Cookie data:** Depending on how you are accessing Abbott Nutrition's online Services, we and our service providers may use "cookies" (a small text file sent by your computer

each time you visit our sites, unique to your Abbott Nutrition account or your browser) or similar technologies, to record log data. For more information see our [Cookie Policy](#).

- We may use Google Analytics, which uses cookies and similar technologies to collect and analyze information about use of the Services and report on activities and trends. This service may also collect information regarding the use of other websites, apps, and online resources. You can learn about Google's practices by going to <https://policies.google.com/privacy/google-partners>, and opt-out of them by downloading the Google Analytics opt-out browser add-on, available at <https://tools.google.com/dlpage/gaoptout>.
- **Social media plugins and data.** In addition, our websites and apps may use social media plugins (e.g., the Facebook "Like" button, "Share to Twitter" button) to enable you to easily share information with others. When you visit any of our online Services, the operator of the social plugin can place a cookie on your computer, enabling that operator to recognize individuals who have previously visited our websites. If you are logged into the social media website (e.g., Facebook, Twitter, Google+) while browsing on our website, the social plugins allow that social media website to receive information that you have visited our website. The social plugins also allow the social media website to share information about your activities on Abbott Nutrition websites with other users of their social media services. Abbott Nutrition does not control any of the content from the social plugins. For more information about social plugins from other social media websites you should refer to those sites' privacy and data sharing statements.
- **Linked accounts.** If you choose to link your social media or Google account to Abbott Nutrition, this allows us to obtain information from those accounts (such as your friends or contacts). The information we obtain from these services often depends on your settings or the applicable provider's privacy policies, so please check these policies before granting us access. You agree that we are not responsible for any acts or omissions by these social media service providers. If you give us permission to access this information, we will use it for the purposes described in this Privacy Policy.
- **Device information.** We may also collect information about the device you are using to access our Services, including what type of device it is, what operating system you are using, device settings, unique device identifiers and crash data. To learn more about what information your device may make available to us, please also check the policies of your device manufacturer or software provider.

Interest Based Advertising. Abbott Nutrition hopes to deliver to you advertising for products and Services you need or want. Abbott Nutrition, its service providers, and partners, use common tracking tools, such as cookies, pixels, web beacons, and similar technologies, to automatically collect information about users for purposes of enhancing their online experience and delivering more meaningful advertisements. Like many companies, Abbott Nutrition may also utilize third-party advertising vendors and other partners to collect this information. Certain laws define this as "cross-context behavioral advertising".

Like most companies, we place advertisements where we think they will be most relevant to customers. One way we do so is by allowing network advertising companies with whom we work to place their own Tools when an individual visits Abbott Nutrition websites and apps. This enables the network advertising company to recognize individuals who have previously visited

Abbott Nutrition websites and apps and to serve you ads based on your web browsing activity, purchases, interests and/or other information—a practice commonly referred to as interest-based advertising (“IBA”) or online behavioral advertising (“OBA”).

These advertising companies may also use these types of technologies to recognize you across the devices you use, such as a mobile phone or a laptop, and serve you ads on websites you visit and applications you use.

Retargeting. One way in which we deliver more meaningful advertisements is through a common form of online advertising known as “retargeting” or “remarketing.” Retargeting works by serving ads on one site based on an individual’s online activities on a different, unrelated site. For example, if you look at Similac® products on an Abbott Nutrition website, you may later see an advertisement for Similac® products when you visit third-party sites. To do this, Abbott Nutrition, or its advertising service providers may use a device ID, cookie, pixel, web beacon or similar technology placed by Abbott Nutrition or our third-party vendor when you visit Abbott Nutrition websites or apps or third-party websites or apps. The placing of these cookies or other technologies on your device may enable you to be identified across multiple websites. You should consult the privacy policies of our service provider and other websites that you visit to understand how they collect and use your data.

Opting-Out of IBA, OBA, and Retargeting Activities.
